

Sebastian Belalcazar

Data & AI Engineer | ETL / BI / AI Automation

sebasbelmosdev@gmail.com · Colombia (open to remote) · linkedin.com/in/sebasbelmos/ · github.com/SEBASBELMOS

SUMMARY

Data & AI Engineer finishing a BSc in Data Engineering and Artificial Intelligence at UAO (Nov 2026). Builds practical ETL pipelines, star-schema warehouses, BI dashboards and AI automation workflows for founders and teams, with core strengths in Python, SQL, PostgreSQL, Airflow, Power BI and Looker Studio.

EXPERIENCE

Spanish Tutor Mar 2026 – Present
Preply (Freelance)

- Teach Spanish to international students in Spanish, English and beginner-friendly German, adapting lessons to each learner.
- Design practical lesson structures and explain complex ideas step by step — directly transferable to documentation and client-facing work.

Growth & Automation Analyst (Project-based) Jan 2026
Bilbao2 · Remote

- Designed lead-intake and qualification automations with n8n, Typeform, ActiveCampaign, Google Sheets and CRM systems.
- Built data pipelines to clean, organise and route inbound leads for sales and operations teams.

Data & AI Engineer (Volunteer) Jan 2025 – Jan 2026
JurisIntel · LegalTech

- Designed NLP pipelines for legal documents, extracting key facts, entities and relationships for analysis and search.
- Implemented case-monitoring automations and supported an AI legal chatbot for faster jurisprudence access.

Data Analyst & Automation Specialist (Project-based) Jul 2024 – Jul 2025
BetterLife Coaching · Remote

- Built a personal-finance MVP with income/expense tracking, business logic and visual reporting for coaching clients.
- Supported workflow automation, product definition and UX for a usable alpha version.

PROJECTS

GeoVision-CLIP Cali
Team-of-3 GeoAI system forecasting air pollution across ~380 km² of Cali. Owned data engineering (5 sources, 108 GB MD5-verified), FastAPI backend, React+Leaflet visualisation, Docker, tests, docs and Hugging Face deployment. R² 0.807; 26/26 tests.
[Python](#) · [FastAPI](#) · [React](#) · [Leaflet](#) · [Docker](#) · [Hugging Face Spaces](#)

LinkedIn Job Postings ETL
ETL pipeline processing 123,000+ job postings. Star-schema warehouse (PostgreSQL), Airflow orchestration, Power BI dashboards.
[Python](#) · [Pandas](#) · [PostgreSQL](#) · [Airflow](#) · [Power BI](#)

Spotify Analytics ETL
Airflow pipeline on GCP integrating 114,000+ Spotify tracks and 4,810 Grammy records. Reduced duplicates by 28.6%, generated 81,941 enriched rows and delivered Power BI dashboards.
[Python](#) · [Airflow](#) · [PostgreSQL](#) · [GCP](#) · [Power BI](#)

Abodi ML
Legal-term expiry risk classifier for a real LegalTech app. XGBoost model reached F1=0.89 and AUC=0.91 on synthetic data; shipped with MLflow, FastAPI, Docker, monitoring and CI/CD.
[Python](#) · [XGBoost](#) · [FastAPI](#) · [MLflow](#) · [Docker](#) · [GitHub Actions](#)

Global Happiness Prediction Pipeline
ML pipeline predicting happiness scores across 164 countries. Selected Random Forest (R² 0.8639, RMSE 0.415), with PostgreSQL audit trails and Kafka streaming for prediction events.
[Python](#) · [scikit-learn](#) · [Kafka](#) · [PostgreSQL](#) · [Docker](#)

EDUCATION

Data & AI Engineering (Bachelor's) Jan 2023 – Nov 2026
Universidad Autónoma de Occidente (UAO)

AI Bootcamp — Deep Learning & Computer Vision 2024
Universidad Tecnológica de Pereira · MINTIC

Data Analytics — Honours (DS4A) 2022
Correlation One

SKILLS

Core Data: Python, SQL, PostgreSQL, ETL, Airflow, Pandas, data cleaning	BI & Warehousing: Power BI, Looker Studio, dashboards, KPIs, star-schema warehousing
AI Orchestration & Automation: n8n, multi-agent workflows, prompt engineering, human-in-the-loop review	Engineering: FastAPI, Git/GitHub, pytest, GCP, AWS, Hugging Face Spaces
Hands-on Exposure: ML, Statistics, Deep Learning, Geospatial, React, TypeScript, Node.js, Neo4j, Kafka, Docker	Languages: Spanish (Native), English (C2), German (A2)

AWARDS

Finalist — Datathon del Pacífico, Xperts team (2024)
